VIGIE

Environmental and social safeguards dashboard

A whole project's E&S monitoring in a single tool – offline, adaptable to any funder.

VIGIE brings together, in a **single self-contained file**, the complete management of a project's environmental and social safeguards: sub-project screening, E&S instruments, monitoring missions, indicators, management plans, grievance mechanism and reporting. It runs with no installation, no server and no internet connection; data stays on the user's own computer.

What VIGIE manages

Portfolio & E&S screening – register of sub-projects, screening, risk level, applicable instrument and standard, territorial breakdown by region and locality.

Field compliance – checklist-based monitoring missions, computed compliance rate, contractors' construction ESMP, non-compliances and follow-up.

Instruments & planning – E&S instruments, project components, annual E&S work plan and budget, execution sequencing and schedule.

Accountability – grievance redress mechanism with a confidential SEA/SH channel, incidents, stakeholder consultations (SEP).

Indicators & mapping – results indicators, built-in charts, map of completed works.

Reporting – consolidated dashboard, multi-sheet Excel export, ready-to-submit Word report for the funder.

Mobile field companion – *VIGIE Field*: offline data entry on a phone (GPS, photos, signature), merged into the tool without re-keying.

KEY POINTS

- A single file, no installation and no server; works fully offline.
- Data kept locally – nothing in the cloud (confidentiality of SEA/SH complaints).
- Adaptable to a new project within hours.
- Built-in backup reminder and recoverable backups.

FUNDER COMPLIANCE

Frameworks supported, as the project requires: World Bank **ESS**, African Development Bank **OS**, IFC **PS**, IFAD **SECAP**.

DEPLOYMENT AND CONFIGURATIONS

- **In service** – PDEC, Casamance Economic Development Project (World Bank), ESS framework.
- **Configured version** – African Development Bank Operational Safeguards framework, shown on request.

E2CS Consult at a glance — over 30 years of environmental and social practice since 1995, 35 E&S studies and instruments produced, 5 countries and 3 transboundary river basins, 17 funders and partner institutions.
